12. Content To Be Provided by Client
13. Assumptions & Open Questions
14. Timeline (Suggested)

1. Project Overview

Medico Overseas is an MBBS (medical) study-abroad consultancy that helps Indian students secure admission to NMC/WHO-recognized medical universities in countries such as Russia, Georgia, Kyrgyzstan, Uzbekistan, Armenia, and Vietnam. The company also supports students through licensing exams (FMGE/NEXT and NMAT) required to practice medicine in India after graduating abroad.

This document defines the requirements for building the Medico Overseas website: its structure, content needs, design direction, and technical specifications, so that a development team (in-house or outsourced) can scope, design, and build the site with no ambiguity.

2. Goals & Objectives

- Establish Medico Overseas as a credible, trustworthy MBBS-abroad consultancy in a competitive market.
- Generate qualified leads (students & parents) through inquiry forms, callback requests, and WhatsApp/phone contact.
- Clearly present each study destination (country) with university options, fees, eligibility, and admission process.
- Provide exam-prep information for FMGE and NMAT to position Medico Overseas as a full-journey partner (admission → graduation → licensing).
- Build long-term organic (SEO) traffic via a blog covering MBBS-abroad topics.
- Deliver a mobile-first, fast-loading site, since most Indian students/parents will browse on phones.

3. Target Audience

- Indian students (typically age 17–22) who did not secure an MBBS seat in India via NEET, or are seeking an affordable alternative.
- Parents of prospective students, who are often the actual decision-makers and bill payers — messaging must build trust and address safety/legitimacy concerns.
- Students who have already completed MBBS abroad and are searching for FMGE/NEXT exam coaching.

4. Branding Guidelines

The visual identity must be derived from the supplied logo (see cover page). Key elements to carry through the website:

Primary Colour (Navy)	#1F3864 — used for the 'Overseas' wordmark, headings, primary text, footer background
Accent Colour (Orange/Coral)	#E15B3F — used for the 'Medico' wordmark, call-to-action buttons, highlights, icons
Logo Iconography	Graduation cap + stethoscope heart + globe with airplane — reinforcing 'education,' 'medicine,' and 'overseas travel'
Typography	Clean, modern sans-serif for body text; a slightly rounded/friendly sans-serif for headings to match the logo's soft lettering
Tone of Voice	Reassuring, professional, and parent-friendly — avoid overly salesy language; emphasize safety, recognition (NMC/WHO), and support

Note: The uploaded logo file is a design proof (currently a standard-resolution JPG). It can be placed directly into the website header/footer at its native resolution. If a larger, ultra-crisp version is needed for large banners, the design team should request the original vector file (AI/EPS/SVG) from whoever designed the logo, since raster images cannot be enlarged without quality loss.

5. Site Architecture & Page List

Below is the full sitemap, based on the client's supplied page list, organized into a logical navigation hierarchy.

Nav Section	Pages
Home About	Homepage
	About Us
Destinations (dropdown)	MBBS in Russia · MBBS in Georgia · MBBS in Kyrgyzstan · MBBS in Uzbekistan · MBBS in Armenia · MBBS in Vietnam
Exams (dropdown)	FMGE Exam · NMAT Exam
Blogs	Blog listing page + individual blog post template
Contact	Contact Us

Recommended additions (optional, common for this industry — flagged for client decision):

- Testimonials / Student Success Stories page or section
- Gallery (campus photos, hostel, student life)
- FAQs page
- Privacy Policy & Terms of Use (required if collecting personal data via forms)

6. Detailed Page Requirements

6.1 Homepage

Purpose: First impression, trust-building, and routing visitors to the right destination/exam page.

- Hero banner with headline (e.g., "Your Trusted Path to an MBBS Degree Abroad"), sub-headline, and a primary CTA button ("Get Free Counselling" / "Talk to an Expert").
- Quick-glance trust bar: years of experience, number of students placed, NMC/WHO-approved universities, countries covered.
- "Why Study MBBS Abroad" section — short benefit list.
- Destinations preview grid — 6 country cards (flag/photo, short blurb, "Learn More" link) linking to each destination page.
- Admission process — simple 3–5 step visual (Consultation → Documentation → University Selection → Visa → Departure).
- Exams section teaser — links to FMGE and NMAT pages.
- Testimonials carousel (if approved).
- Blog highlights — latest 3 posts.
- Lead-capture form (name, phone, email, preferred country, NEET score) — visible in hero and/or as a sticky/floating button.
- Footer with contact details, quick links, social icons, and office address.

6.2 About Us

- Company story/mission — why Medico Overseas was founded.
- Years of operation, number of students placed, countries served.
- Team/counsellor profiles (photos + credentials) — builds trust with parents.
- Accreditations/partnerships with universities (logos, if available).
- Office locations (with embedded map if multiple branches).

6.3 Destination Pages (×6: Russia, Georgia, Kyrgyzstan, Uzbekistan, Armenia, Vietnam)

Each country page should follow an identical template for consistency and SEO:

1. Overview of studying MBBS in the country (why choose it).
2. Eligibility criteria (age, NEET requirement, academic %).
3. List of top/partner universities with: NMC/WHO recognition status, duration, medium of instruction, hostel availability.
4. Fee structure table (tuition/year, hostel, mess, one-time costs).
5. Admission process & required documents checklist.
6. Visa process overview.
7. Living costs / student life / climate notes.
8. FAQs specific to that country.
9. CTA form ("Check your eligibility for MBBS in [Country]").

Note: Each of the 6 destination pages will reuse this same template with country-specific data—content must be sourced/verified per country (see Section 8 & 12).

6.4 Exams — FMGE

- What is FMGE (Foreign Medical Graduate Examination) and who must take it.
- Eligibility and registration process.
- Exam pattern, syllabus overview, and important dates/frequency.
- Preparation tips / coaching offered by Medico Overseas (if applicable).
- FAQs and CTA to enroll in coaching / request guidance.

6.5 Exams — NMAT

- What is NMAT and its relevance to the admission process (note: content team should confirm whether this refers to the National Medical Admission Test used by certain destination countries, or another exam — see Open Questions).
- Eligibility, exam pattern, and syllabus.
- How Medico Overseas assists with NMAT preparation/registration.
- FAQs and CTA.

6.6 Blogs

- Blog listing page: grid/list of posts with featured image, title, excerpt, category filter (by country/exam/general), and search.
- Individual blog post template: title, hero image, author, publish date, rich-text body, related posts, social share buttons, CTA form at the end.
- CMS requirement: client should be able to add/edit/delete blog posts without developer help (see Section 9).

6.7 Contact Us

- Contact form (name, phone, email, message/query).
- Office address(es), phone number(s), email, WhatsApp click-to-chat button.
- Embedded Google Map.
- Office hours.
- Social media links.

7. Global Website Elements

Header / Navigation

- Logo (top-left, linking to homepage).
- Main menu: Home, About, Destinations (dropdown), Exams (dropdown), Blogs, Contact.
- Prominent CTA button (e.g., phone number or "Free Counselling") always visible.
- Mobile: hamburger menu with collapsible dropdowns.

Footer

- Logo + short tagline.
- Quick links (sitemap).
- Destination links.
- Contact info + social icons.
- Copyright line + links to Privacy Policy / Terms.

Lead Capture / Forms

- A consistent enquiry form component reused across Home, Destination pages, Exam pages, and Contact.
- Form fields: Name, Phone, Email, City, Interested Country (dropdown), NEET Score (optional), Message.
- Form submissions should email the team and/or integrate with a CRM/Google Sheet (to confirm with client).
- WhatsApp floating chat button site-wide (very common and expected in this industry).

8. Content Sourcing & Reference Sites

The client has supplied the following reference websites as tonal/structural benchmarks for content and layout style. These should be used as inspiration for structure and content depth only — all final copy must be written originally to avoid duplicate-content SEO penalties and copyright issues.

mbbsadmissionabroad.in	Reference for destinationpage structure, process steps, and trust-building copy style
ewings.co.in	Reference for layout/content approach
msradmissions.com	Reference for layout/content approach

Action for content team: Review each reference site page-by-page against the Section 6 template above, extract the information categories (not the wording), and draft original content per destination/exam page.

9. Functional Requirements

Feature	Requirement
Content Management System (CMS)	Client must be able to edit pages and publish blog posts without a developer (WordPress recommended for this use case, or an equivalent CMS)
Lead Forms	All enquiry forms submit to email + optionally a CRM/spreadsheet; spam protection (reCAPTCHA) required Floating click-to-chat button linking to business WhatsApp number
WhatsApp Integration	Categories, tags, search, pagination, related posts
Blog / Articles Module	Site-wide search bar (optional but recommended)
Search	Reusable destination-page template driven by a content model, so adding a 7th country later doesn't require a new page build
Multi-country Template	Google Analytics 4 + Google Search Console integration
Analytics	Fully responsive across mobile, tablet, desktop — mobile-first, since most traffic is expected on phones
Responsive Design	

10. Technical Requirements

- Platform: CMS-based build (e.g., WordPress) is recommended for ease of ongoing content/blog updates by non-technical staff. A custom-coded site is an alternative if the client has developer support long-term.
- Hosting: Reliable hosting with SSL certificate (https) — required for trust and SEO.
- Domain: To be confirmed/purchased by client (e.g., medicoverseas.com or similar).
- Performance: Page load under 3 seconds on mobile; optimized/compressed images.
- Browser support: Latest versions of Chrome, Safari, Firefox, Edge.
- Security: SSL, spam-protected forms, regular backups.
- Accessibility: Reasonable adherence to WCAG basics (alt text on images, readable contrast, keyboard navigation).

11. SEO Requirements

- Unique, keyword-optimized title tags & meta descriptions per page (e.g., "MBBS in Russia for Indian Students | Fees, Eligibility, Top Universities").
- Clean URL structure (e.g., /destinations/mbbs-in-russia/).
- Optimized image alt text throughout.
- XML sitemap and robots.txt.
- Schema markup for organization, FAQs, and articles/blog posts.
- Internal linking between destination pages, exam pages, and related blog posts.

12. Content To Be Provided by Client

To avoid delays, the client should supply the following before/during development:

10. High-resolution/vector version of the logo (AI, EPS, or SVG) for print-quality and large-format use.

11. Company registration details, years of operation, and any accreditations/awards.
12. Counsellor/team bios and photos.
13. Per-country data: partner university names, fee structures, eligibility criteria, and any exclusive tie-ups.
14. Testimonials (text and/or video) from past students, with permission to publish.
15. Real office address(es), phone numbers, WhatsApp number, and email.
16. Photos: office, team, student events (if available) — otherwise licensed stock photography will be sourced.
17. Preferred domain name and any existing hosting/domain credentials.
18. Initial batch of blog topics or existing blog content, if any.

13. Assumptions & Open Questions

The following need client confirmation before/at project kickoff:

- "NMAT Exam" — please confirm exactly which exam this refers to (there are multiple exams that share similar names in different countries/contexts) so the correct content is prepared.
- Should the destinations list be expandable in the future (e.g., adding more countries), and if so, should the CMS be structured to let the client add a new country page themselves?
- Will forms integrate with a specific CRM (e.g., Zoho, HubSpot) or is email/spreadsheet sufficient at launch?
- Is a multi-language version needed (e.g., Hindi) given the target audience?
- Do testimonials, student photos, and university tie-ups already exist, or do they need to be collected as part of this project?
- Confirm number of office locations for the Contact page and footer.

14. Timeline (Suggested)

Timeline is a suggested baseline for planning purposes and should be adjusted once scope (e.g., number of pages, CMS choice, content readiness) is finalized with the development team.
